THE SIGNALS YOU WILL HEAR

1. **RINGING SIGNAL**—An intermittent "burr-r-ring" sound. Indicates the telephone you dialed is being rung.
2. **BUSY SIGNAL**—A steady "buzz-buzz-buzz". Indicates the line you dialed is in use.
3. **WRONG DIALING SIGNAL**—A continuous, high-pitched, siren-like tone. Indicates you have dialed incorrectly. Hang up, be sure you have correct dialing information, then try again.

USE OF PARTY LINE TELEPHONES

1. If you do not hear dial tone or conversation, ask if line is in use. If so, hang up and try later. If not, wait for dial tone.
2. If you hear clicks when you lift the receiver, another person is dialing. Explain that you have interfered and that he should hang up and try again. Then hang up and let the other person call.
3. To call another party on your line—

   Two-Party Lines —Dial the desired party's number. When you hear the busy signal, hang up and your bell will ring intermittently. When ringing stops, lift receiver and talk. If called party does not answer, stop the ringing by removing receiver and replacing it.

   Multi-Party Lines—Dial the desired number, you will then receive a high pitch tone, then dial the special code number which appears on your telephone number plate, beneath your number, you will then hear a busy signal, hang up, and your telephone will start to ring. When ringing stops lift receiver and talk. If called party does not answer, stop the ringing by lifting the receiver and replacing it.
4. To identify another party on your line—dial "611" (Repair Service).
