There were several cases of Scarlet Fever in the early part of the year. The first case was that of Paul Firrell, son of the House Officers at No. 8, who attended high school at Evans City, going back and forth on the Harmony cars. About the same time that Paul was stricken, Arnold Breuning, son of the House Officers at No. 18, attending school at Bradford Woods, traveling back and forth on the Harmony cars, was attacked by the same disease. No other cases developed at No. 8 but one case developed at No. 18, another at No. 2, one at No. 4, and one at No. 15.

Because of the crowded condition of the Municipal Hospital, it was necessary to care for all these cases save one in our own Infirmary which was vacated as a reception cottage and placed in charge of an experienced, competent, trained nurse. All the cases made a good recovery.

There was one case of clinical Diphtheria during the year but no bacteriological cases. There was one death during the year, Robert Dobozy, a marked psychopathic case who had been afflicted from earliest years with unusual sexual appetites. His death occurred on the 31st of March at the West Penn Hospital to which he had been taken for treatment. There were accidents and minor physical cases during the year which were treated at some one of the City Hospitals.

A boy by the name of John Sorockman, who came to the School with a bad heart, developed serious heart trouble and was taken to the West Penn Hospital on the 12th of May. At first his immediate death was expected but he became better and at times was up and around at the Hospital. The physicians at the Hospital considered that his chances would be better in a private home than in the Institution and he was discharged by the Court to the Home Finding Department on the 22nd of October. He died at the West Penn Hospital on the 12th of December.

The activities of the common schools have gone forward with their usual effectiveness during the year. The boys as a rule have been interested in and attentive to their studies and have made substantial progress therein. Miss Frances Oddi, teacher of the eighth grade, retired at the close of the school year and Miss Helen B. Gregory, a graduate of one of the State Normal Schools, and most highly recommended by her instructors and Superintendent of the schools of the County in which she taught, was appointed in Miss Oddi's place.

The holidays were observed by proper exercises in the Assembly Hall and during the Summer months with field sports in addition. The regularly scheduled series of base ball games were played from the middle of April to the Saturday before Labor Day. The custody of the trophy cup for the ensuing year was won by the Nine from
